

Buckmynter. 1590.

A new Almanacke
and Prognostication,
for the yeere of the incar-
nation of our Lord
Iesus Christe.

M.D.XC.

Which is the yeere of the
worldes creation. 5552.

Seruyng generally for all
England and specially for
the Description of this
honorable Citty of
London Cather.

red & made by
Thomas Buckminster.

To the Reader.

FOrasmuch (as I haue heard) that some men haue not conceyued wel of the placynge and settinge downe in the Kalender of these yeerely Almanackes the names of certayne persons, who haue lyued long heretofore, and whereof some haue been famous for Learning and good lyfe, and haue also confirmed their Doctrines by tormentes and death: as other we graunt were not worthy of mention or memory, much lesse to be called Saintes, and I suppose none do so esteeme them, neyther do we so affirme of them, but do set them downe for purposes which cannot well be omitted: namely as notes and markes of some certayne matters, whose appoynted times to know may do much good, as contrarily to be ignoraunt of the same, may do to some men much harme: for they are

To the Reader

not set downe onely to notifie the generall and principall Fayres (for which yet they serue) but to make knowen the Lawdayes in the Courtes of the Arches, and Audiance of the Court of Consistory, and also of the Court of the Admiraltie for cyuill causes, and the Courtdayes of other Maiesties Commissioners vpon appeales, and such lyke. I am therefore to request such men to beare with vs the Writers. And I entreate them to desire Reformation at their handes in whom the power to reforme doth consist: which being obteyned, the thyng shalbe by vs as speedely, as lawfully and orderly remedied and redressed. Vale.

For this yeere of our
 Lord. 1590. which is the se-
 cond after the Leape yeere, accor-
 ding to the accompt of the
 Church of England.

------	---	----------------	-----------

A necessarie Rule to know the beginning and ending of euery Terme.

Quintile Terme beginneth the. xxiij. of Ianuarie (if it be not Sunday) & endeth the. xii. of Februarie. Which Terme hath foure returnes.

That is to say.

Octabis Hillarii.	}	Crastino purifica.
Quind. Hillarii.	}	Octabis purifica.

Easter Terme beginneth. xviij. dayes after Easter, and endeth the Sunday next after the Ascension day. And hath fyue returnes.

Quind. paschæ.	}	Mense	}	Quinq; paschæ.
Tres Paschæ.	}	Paschæ	}	Crastin. Ascensio

Trinitie Terme beginneth the Fryday next after Trinitie Sunday, and endeth the Wednesday fortnight after. And hath foure returnes.

Crast. Trinitaris.	}	Quind. Trinitatis.
Octab. Trinitatis.	}	Tres Trinitatis.

Michaelmas Terme beginneth the. ix. day of October (if it be not Sunday) & endeth the. xviii. of November. And hath eight returnes.

Octabis Michael.	}	Crast. Animarum.
Quind. Michael.	}	Crast. Martini.
Tres Michael.	}	Octa. Martini.
Mense Michael.	}	Quind. Martini.

Note also that the Exchequer openeth eyght dayes before any Terme beginne, except Trinitie Terme, which openeth but foure dayes before.

Buckmyminster. 1590.

A Prognostication
for the yeere of
our Lord God.

M.D.XC.

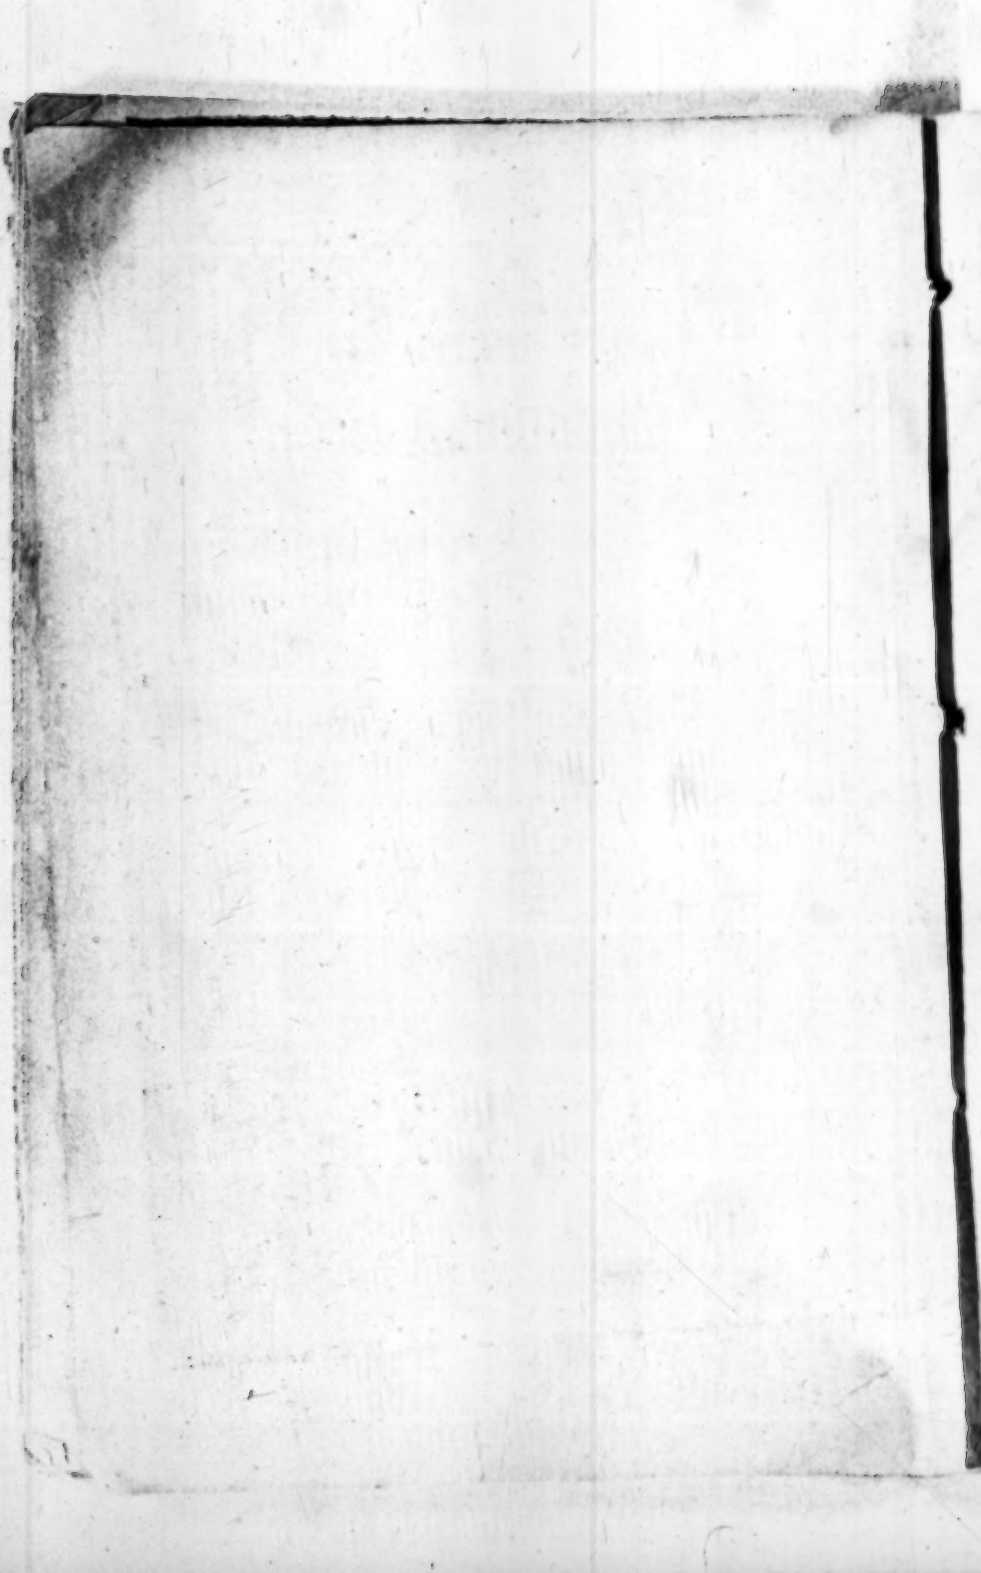

Seruing generally for all
England, but specially
for the Meridian of
this honora^ble ci-
tie of London.

Writte by

Thomas Buckminster.

*Imprinted at London by
Richard Watkins and
James Robertes.*

CVM PRIVILEGIO.

Notes for conuenient tymes to Sowe, Set, Plant, and Graffe.

It is good to Set, Sow, Plant, or Graffe, when the Moone is in Taurus, Virgo, Capricorne, or Pisces, betwene the full and the change.

Ye may sowe Seedes, especially in Gardens, betwene the change and the full, in Virgo, Sagittari, or Pisces.

Sow or set such Seedes or Hearbes as ye would haue to bring foorde for store, euery new Moone from February to Iune.

If you do remoue any Trees, or wyl plant them that are young, it is best to do it in the last Quarter of the Moone, the beyn in Taurus or Capricorne, in February or September.

Cut Vines in Libra, Aries, or Scorpio, in February, March, September, or begynnyng of October.

Cut Trees for Tymber at the last Quarter of the Moone, in the signes Aquarius and Pisces.

A Prognostication.

Some short notes to be considered
in letting of Blood, Purging, Ba-
thying, and Sweatyng.

Let first cause make thee to be lett Blood,
and that with the counsell and aduyce
of the learned Physitian, who by his
knowledge and good discretion, can consider
of these or such lyke observations.

First to whom, or for whom, Bloodlet-
tyng is meete and necessary.

Secondly, what is to be obserued before
Bloodlettyng.

Thyrdly, what in the tyme, & what after.

Fourthly, in what tyme of the sicknes it is
to be used.

Fyftly, what veyne is to be opened.

Sixtly, the measure and quantitie to be let
out. &c.

The generall and vsual Signes for Chol-
lericke complexions to be let Blood in, are
Cancer, Scorpius, and Pisces.

For the Flegmaticke, Aries & Sagittarius.

For the Melancholy, Libra, Aquarius,
and

Buckmynster. 1590.

and Pisces.

For the Sanguine complexion, any of these wyl serue, and may be vsed.

Of Purging.

In Purging these thinges ought to be knowen and kept.

- 1 The Humour which aboundeth.
- 2 The way best to auoyde it.
- 3 The strength of the person.
- 4 The maner of the Sicknes.
- 5 The force & nature of the Medicine.

For where these thynges are not considered and obserued, many perillous accidentes may folow, and greatly greene the body.

Good signes for Purging generally are Cancer, Scorpius, and Pisces.

Perticularly, as with Potions & Drinckes, purge when the Moone hath her course in Scorpio.

With Electuaries, when she is in Cancer.

With Pylls, when she is in Pisces.

Take Clysteres, when she is in Aries, Taurus, and Capricorne.

Take Gargarismes, in Aries & Cancer.

C. ltt.

Take

A Prognostication.

Take Preparatiues, in Gemini, Libra, and Aquarius.

Take Glysters, when the Moone is in Libra and Scorpius.

Stoppe Fluxes, Retumes, and Laskes, when the Moone is in Taurus, Virgo, and Capricorne.

For vsing Ointmentes and Plasters, let the Moone be in that signe which governeth the member or part of the body, that is to be annoynted or plastered.

Of Bathing.

Bathinges are commonly vsed, rather for pleasure then profite; especially where hotte houses are ouer much haunted: but I minde not to speake of them in this place, otherwise then to aduertise those that tender their owne health, to be wary and circumspect in resorteing vnto them without iust cause, and immediately after, or with such persons as be vncleane.

Know that it is not good to Bath, when the Moone is in the earthy signes, as in Taurus, Virgo, and Capricornus. The reason

Buckmynster. 1590.

son is, because they are of colde and dry nature, and the nature of colde is to restrayne and bynde: and so the Moone being in these signes, the pores of the body are closed and shut, so that there can be no resolution of humors, and superfluities, which by bathyng ought to be auoyded.

But in the fyerie signes, as when the Moone is in Aries, Leo, and Sagittari, then is it a good time for Bathyng, for then the body is apt to resolution, for it is the nature of heate to open & resolue.

It is best to Bath two or three dayes after the change, and at the full Moone, for then the superfluities are ripe & ready to auoyde, and disposed to flowe out and issue: which in deede is the very ende and vse of Bathyng.

If any wyl enter into Bath onely for clemynes sake, let the Moone be in Libra or Pisces.

Further, yf Bathyng be vled for health, let the partie greened learne of the wyse Philisition whether his sicknes hath neede of moystenyng or dry'ng: for yf it do requyre moystnyng, as in Pthisis, and such lyke, then
C. llll. let

A Prognostication.

let hym bath in watery signes, hauyng good aspectes of Iupiter and Venus. But yf the sicknes require dryng, as in Paralisis, and the lyke, then let hym bath, the Moone be-
yng in feerie signes, hauyng good aspectes of Mars and Sol.

Also before ye enter into any Bath, your body must be purged, for yf a man goe in vn-
prepared and unpurged, peraduenture he may be worse after then before.

The best tyme of the yeeare to bath in, is in the Spring and Haruest, and in them the monethes of May and September. The best tyme of the day to goe into the Bath, is an houre after the Sunne rysing at the least, alwayes provided, that ye must walke eyther an houre, or halfe an houre before, and haue a stoole, eyther by nature or by art. Ye must couer your head wel, so long as ye be in the Bath, and beware that ye drinke no colde drinke though ye be very thursty, but forbear all thynges that are colde, least when ye are hotte with in, the cold strike sodaynely into some principall member, and so hurt you.

The tyme of taryng in the Bath is com-
monly

Buckminster. 1590.

monly one houre, but it may be more or lesse, according to the nature of the Bath, or sickness of the partie, at the discretion of the good Physitian.

Of Sweatynge.

Sweatynge, as thye are of two sortes, that is to say, naturall and artificiall: so they are used for two endes and purposes.

The naturall Sweate, if good heed be taken in opening the Pores, wyl dissolve grosse and thicke humors, wyl cleanse the blood, wyl comfort the spirites, wyl put away colde, wyl consume rawe humors, qualifie and quench ragynge fevers, wyl helpe in manie and the droppe.

The artificiall Sweate, wyl cleanse scabbes, put away the itche, amende the Pulnes in hearyng, ease the stone, resolve congealed and colde melancholy blood and humors. &c. But for the better performing and effectuall working in these cases, the counsell of the learned Physitian is to be desired and used.

The signes best to Sweate in, are Aries, Leo, and Sagittari.

OF

A Prognostication.

Of the foure naturall vertues.

The fyrst is the vertue Retentive, and is called so, because it doth wetb noysishment into due places. It is best comforted when the Moone is in Aries, Leo, or Sagittari.

The seconde is the vertue Digestive, named so, because it digesteth or altereth the noysishment into a due forme: If it be too weake to do the office. It is best strengthened when the Moone is in Gemini, Libra, or Aquarius.

The thyrde is the vertue Retentive, and is called so, because it keepeth in the noysishment, untill the Digestive vertue hath duly digested it. It is chiefly helpen the Moone in Taurus, Virgo, or Capricorne.

The fourth is called the vertue Expulsive, because his office is to expell those superfluous excrementes which remayne when the other vertues have done their office duly. It is strengthened best the Moone being in Cancer, Scorpius, or Pisces.

Of

Buckmynster. 1590.

Of the Eclipses which
shalbe this yeere. And fyrst of
the Eclipse of the Sunne.

This present yeere of our Lorde God
1590. on Tuesday, being the .xxi. of
July, at .viii. of the clocke in the morn-
ing. he :e wyll appeare and be seene
unto vs an Eclipse and darkning of the
Sunne, and it wilbe darkened. .i.e. poyntes
and .xxiii. min. and is within ii. degrees of
the Dragons head, and in the signe Leo.

The Doore wyll beginne to shadowe the
Sunne with vs here at London, at .vii. of the
clocke, or not long after, and it wyll be cleerely
voyded of al darkenes at .ix. of the clocke. .xxv.
minutes. So that the whole continuance
from the beginning to the ende, wyll be two
houres and somewhat more. This Eclipse
shalbe seene in the East and by South. &c.

By the Iudgements of some Learned
men, this Eclipse betokeneth to Women un-
tymely birthes, with peryll of their liues.
To men of rype yeres, and hot complexions,
harpe

A Prognostication.

Sharpe Feuers, or the plague Ague. To chyl-
dren, burning heate in their braynes, and o-
ther partes of their bodies. &c.

Of the Eclipse of the Moone.

THE seconde Eclipse, which is of the
Moone, shalbe the. xxx. day of Decem-
ber, beyng Wednesday, at. v. of y^e clocke,
and. xxvi. min. in the enenyng, in the signe
Cancer, and within. vi. degrees of the Dra-
gons head. She shalbe darkened viii. poyntes
and. x. minutes, and the Moone shall begin to
come vnder the shadowe of the earth here
with vs at London before her rysing, so that
she shall ryse eclipsed in the East Northeast.
This Eclipse shalbe ended at. vi. of the clock
and. lvi. minutes &c.

There is also an other Eclipse of the
Moone, which wilbe the. vi. day of July a-
foresayd : but because it is small, and shall
not in any part be seene with vs (as I ga-
ther) I cease to say any thyng of it, inas-
much also as the influence thereof respecteth
those that inhabite the westerly partes of
the worlde, and not vs.

A de

A description of the foure quarters of the yeere, and a declaration of the dispositi- on of the same.

Of the VVinter quarter.

THE Winter quarter Astronomicall of this yeere, which is since Christes incarnation. 1590. began the. xii. day of December last past, beyng Fryday, for then the Sunne entred into the signe of Capricorne, and made our Winter Solstice, ha-uyng the shortest day and longest nyght, by reason that the Sunne is then farthest from our vertical poynt: and so Winter doth continue vntyll Wednesday the. xi. of March folowyng, that the Sunne enter into the signe Aries.

This season is by nature colde and moyst, displeasunt for the most part to travellers, ether by lande or by sea, and vnto aged persons it is very cumbeious and noysome, causyng superfluitie of ratures, and abundance of colde moystnes to ouerflowe their bodies, to the great trouble and inquietnes. ca.

This

A Prognostication.

This quarter, as I gather, wyll not vary much from the natural disposition, especially for colde wyndes & some boysterous stormes, noysome and hurtfull to men and cattell &c.

The sicknesses of this season, are paynes in the sydes, inflammations of the lunges, catarrhes, coughes, paynes in the breast, ache in the head, palfies, hoarsenes, and vnto some consumptions, dymmes of syght, and difficultie of makying water.

Of the Spring.

The Spring, which is the seconde part of the yere Astronomical, beginneth when the Sunne entereth into the fyfth minute of the signe Aries, which is on Wednesday, the.xi. day of March, about. x. of the clocke in the forenoone, makying the Equinoctial vernal, the day & nyght of one equal length: and so the Spring continueth vntyll the. xlii. day of June, that the Sunne enter into the signe Cancer. &c.

This Quarter is naturally hot and moyst temperately, and is therefore rightly reckoned the most hollesome and comfortable time of all the

ye yere. Now in this tyme it is best remo-
uyng of sicknesses and griefes gotten before,
and also to auoyde & p̄uent those that are to
come, for now the dull senses and spirites of
men and other creatures are quickned and
reulued, and therefore the humors which do
abounde, & are redy to repress nature, are re-
diest to be empyed and auoyded, whether by
bloodlettyng, purgyng, or other wyse.

Touchyng the state and temperature of
the weather in this Quarter, I gather that
it wylbe very seasonable & kyndly, disposed
to pleasaunt and hellesome wyndes, and mo-
derate moysture, which throug Gods good-
nes shall cause the frutes of the earth so to
encrease and fructifie, as shall p̄uoke all
men to prayse his holy name, and to be hart-
ly thankefull vnto his Maiestie.

The sicknesses and griefes of this season,
are lykely to be Coughes, Coses, hoarsnes,
Scabbes, small Pockes, and the Measels:
and in some, melancholy Madnes, the blacke
Jaundies, the fallying Cuyll, Fluxes of
blood, the Squynsie, and such lyke. Let vs
pray hartely vnto God the maker and gover-
nour

A Prognostication.

nour of Heauen and Earth, to be mercifull
vnto vs, and to forgiue vs all our finnes, and
geue vs grace to amende our liues, which is
the cause of all these & other cor rections and
punishments fully layde vpon vs.

Of the Sommer.

Sommer, the thyrde part of the Astrono-
mical yeare, both begin at the entry of the
Sunne into the first min. of the signe
Cancer, which is on Fryday the. xii. of
June, at. ix. of the clocke, and. xxiij. min.
before noone, making the Sommer Solstice,
and hath then his greatest inclination to the
North from the equinoctiall, and then the
day is longest, and the nyght shortest: and so
Sommer continueth by this account vntyll
the. xlii. day of September next.

This season accordyng to his proper na-
ture is hot and dry, lyke vnto Choller, tur-
nyng the humors in mens bodies from cold-
nes and moystnes into hotnes & drynes. &c.

I rather by probable coniectures in skyl,
that this quarter wyll be temperate & warme
for

for the most part, and goodly for the Fruites
of the earth, yet in the monethes of August
it is to be feared, that more moysture wyll
fall then is to be desired: wherefore it shall
behoue good Husbandmen to be wary and
diligent, to take the oportunitie of tyme,
whereby they themselves may be profited,
and others benefited and relieved.

The sicknesses of this season are hot Fe-
uers, Coughes, Fluxes, watering Eyes,
paynes in the Eares, Blisters, sores in the
Mouth, immoderate Sweates, Scabbes,
and such like, as Byles, Itchinges, Ulceres
of sundry sortes, dry Skurfynes, corruption
in the Lungs, and many other maladies,
whereof I cease to speake at this present.

D.i.

OF

A Prognostication.

Of Haruest.

Haruest, the fourth and last part of this
yeere, doth begyn on Sunday the. xiiij.
Day of September, at one of the clocke
and. xxvi. minutes after noone, for then the
Sunne entreteth into the fyrst part of the signe
Libra, and maketh the Winter æquinoctiall,
the day and nyght beynge of one equall length
as in the Spring: but the seasons are farre
vnlike in qualitie, for this time is of it selfe
vncōstant and variable, warme in the day
tyme, and colde in the nyght &c.

As concernynge the state of the weather in
this season, I thinke it wylbe somewhat tem-
perate, with South wyndes, and dyuers
shewes of rayne, no great frostes of any con-
tinuance, nor much snow, but many close
and lowryng dayes, with sodayne blastes of
wynde and scatterynge flecte, makynge it raw
colde, and vncōstant for Trauellers, eyther
by Sea or Land.

The sicknesses lyke to be in this season,
are

Buckmynster. 1590.

are griefes in the Sydes, inflammations of the Linges, Coughes, paynes in the Brest, and in the Loynes, the Collicke, Palsies, Headach, Stitches, Sciatica, Dropsies, Begrim, and such lyke. Yea, this Quarter because of the iniquitie of temperature, may as Hipocrat sayth, be called the Mother or Nurse of deadly sicknesses. And Galen sayth, that this tyme is most perillous: for whatsoeuer hath bene yll in the seasons before, and because of the euill state of the ayre in the hot Sommer, it will geue great force to the Pestilence, or pestilentiall Fever.

Lorde Deale thou with vs in mercy, and rewarde vs not after our iniquities, we confesse that we dayly deserue thy heavy hand, and wrathfull indignation to lyght vpon vs, but thou art a gracious and mercifull God, and sparest when we deserue great punishment, in thy wrath thou thinkest vpon mercy.

D. ii.

A de-

*A Declaration of the
dayly disposition of the weather in
euery month through the whole yeere,
with the day, houre, and minute, of
the change, full, and quarters of
the Moone, for this yeere
of our Lord God.*

1590.

Of Ianuarie.

The fyrst day of Ianuary, colde and
close weather.

The fyrst quarter on Fryday, the
second day, at. viii. of the clocke at
nyght, wyndy, with raine or some cold sleete.
The iij. and. liii. dayes, colde and diuers
shewers of rayne. The. v. and. vi. dayes, in-
constant and foule weather. The. vii. and
viii. dayes, more temperate and fayre then
the former. The. ix. day dry, but colde.

The full Moone on Saturday, the. x. day,
at two of the clocke and. xlii. min. at after
noone, temperate for this tyme. The. xi. and
xii. dayes, good kyndly weather. The. xiii.
and

Buckmynster. 1590.

and. xliiii. dayes, rayny cold weather. The xv
and. xvi. dayes, very foule weather, with
wynd and rayne. The. xvii. day, close and
colde weather.

The last quarter, the. xviii. day, beyng
Sunday, at. vi. of the clocke and. xxi. min.
in the eneyng, colde and somewhat wyndy
weather. The. xix. and. xx. dayes, cold and
lowyng weather. The. xxi. and. xxii. dayes,
rayne and scatteryng fleete. The. xxiii. and
xxiiii. dayes, very variable, and some great
blastes of wynd.

The new Moone on Sunday, the. xxv.
day, at. i. of the clocke and. xxi. min. in the
after noone, cold wynd, & variable weather.
The. xxvi. day, some drylyng rayne.
The. xxvii. and. xxviii. dayes, wyndy & wet.
The. xxix. and. xxx. dayes, more mylde.
The. xxx. i. day, enslyned to frost.

Of Februarie.

The fyist quarter on Sunday, the. i. day,
at. viii. of the clocke and. xxx. min. before
noone, a frost, and sharpe wynd. The. ii.
D. iii. day,

A Prognostication.

Day, much lyke to the fyrst The. iiii. and
liii. dayes, rawe weather, and colde wynde.
The. v. and. vi. dayes, somewhat wyndy,
but holdyng vp for the most part. The. vii.
and. viii. dayes, comfortable for this tyme.

The full Moone on Sunday, the. ix. day,
at. x. of the clocke before noone, some mys-
felyng rayne or flete. The. x. day, some
wyndy shewers. The. xi. and xii. dayes,
some flete, or colde grosse rayne. The. xiii.
and. xiiii. dayes, more mylde then the for-
mer. The. xv. day, fayre and dry.

The last quarter on Sunday, the. xvi.
day, at two of the clocke in the. after noone,
somewhat colde and lowyng. The. xvii.
and. xviii. dayes, very variable and incon-
stant weather. The. xix. and. xx. dayes, raw
colde weather. The. xxi. and. xxii. dayes,
some snowe falleth, the weather also cloudy
or close. The. xxiii. day, waneryng and
colde.

The new Moone on Tuesday, the. xxiiii.
day, at one of the clocke, and. xiii. min. in
the mornyng, colde and moyst weather.
The. xxv. and. xxvi. dayes, cold ayre, but the
Sunne

Buckmynster. 1590.

Sunne shynnyng often tymes comfortable.
The. xvii. and. xviii. dayes, sayre freshe
wether.

Of March.

The fyrst day of March is wyndy to-
warde nyght, and before cloudy and
colde.

The fyrst quarter, on Munday, the. ii.
day, at mydnyght, sayre freshe weather.
The. iiii. and. liii. dayes, fresh ayre, and low-
ryng. The. v. and. vi. dayes, wyndy and
shewery. The. vii. and. viii. dayes, very
temperate. The. ix. day, very sayre. The. x.
day, a small frost.

The full Moone on Wednesday, the. xi.
day, at thre of the clocke and. xliii. minutes
in the mornynge, temperate weather.

The. xii. day, sayre, but wyndy in the nyght.
The. xiii. and. xiiii. dayes, some shewers.
The. xv. and. xvi. dayes, close and colde.
The. xvii. day, fresh ayre.

D. liii.

The

A Prognostication.

The last quarter on Wednesday, the. xviii. Day, at. viii. of the clocke in the evening, somewhat wyndy and colde. The. xix. and. xx. Dayes, rayne and wynde, and very colde weather. The. xxi. and. xxii. Dayes, some haile or fleete. The. xxiii. and. xxiiii. Dayes, fierce wyndes, and very cold.

The new Moone on Wednesday, the. xxv. Day, at. x. of the clocke, and. xviii. min. in the evening, variable & fresh weather. The. xxvi. Day, cold and moyst, especially in the nyght. The. xxvii. and. xxviii. Dayes, cleere and temperate. The. xxix. and. xxx. Dayes, fayre and fresh. The. xxxi. Day, lowzyng weather.

Of Apryll.
